*“The Most Important Things to our Business: **Our Customers, Our People and Our Reputation**”*

ABOUT US

Wulguru Group is one of the largest steel fabrication & engineering companies in northern Australia.

The privately owned, Australian company has a core business of providing innovative engineering solutions across its six business units.

Cutting edge technology combined with unrivalled capacity and infrastructure has seen the Wulguru Group position itself as a market leader in steel fabrication and engineering solutions since 1976.

Wulguru Group consists of six separate brands – Abraham Steel & Pipe Fabrication, Archimedes Engineering, Wulguru Civil, Wulguru Rail Maintenance, Wulguru Steel and REV Cranes. While each brand has its own specialisation, it also has the ability to call upon the scale of the Wulguru Group to take on major projects.

From engineering, drafting, fabrication, pipe welding and materials handling solutions to abattoir design, rolling stock maintenance, rail wheel machining, painting and blasting, transport and site labour, Wulguru Group can handle all manor of projects from conception to commissioning.

Wulguru Group prides itself on exceptional customer service and is committed to delivering quality, onsite, on time.

QUALITY & SERVICE

Wulguru Group has developed a strong national identity as a provider of quality mechanical engineering services.

Alongside our in-house Quality Assurance Systems we have gained third party Quality Assurance to ISO9001:2015 Accreditation and established ourselves as an industry leader respected for commercial and quality management policies with an enviable reputation for integrity and reliability.

We offer in-house estimating, engineering, drafting and project management resources and assurance that all manufactured equipment is proof assembled or trial run before being delivered to site.

We have a dedicated Quality Management team as well as Welding Technology Institute of Australia recognised Welding Supervision to ensure all works are completed to the highest standard.

HEALTH AND SAFETY

Wulguru Group is focused on reducing risk and preventing illness and injury among employees, sub-contractors and the community at large.

We are committed to health and safety in all aspects of our business. Regular audits are undertaken of our systems and procedures and we are third party accredited to AS/NZS 4801:2001. We also hold an 'A' ISNetworld rating for our work in the fuel industry and ONRSR accreditation for our rail industry works.

Our comprehensive safety management system means standards are well defined and responsibilities are clear. We encourage all employees and sub-contractors to exceed all health and safety objectives.

Health and safety objectives:

- Comply with all statutory requirements as the minimum standard
- Provide safe work methods, procedures, premises and plant
- Appropriate OH&S training for all employees
- Train employees to be aware of their responsibilities
- Achieve best practice standards through continuous improvement principles
- Management of change in plant, systems and products
- Appropriate rehabilitation for all injured or unwell staff, on and off the job
- Working safely as a condition of employment

SCI QUAL
INTERNATIONAL

Our fully trained staff have the ability to carry out overhauls and repairs on a variety of mechanical equipment.

MACHINING CAPABILITIES

WRM now have established in-house capabilities for all machining, engineering & mechanical fitting requirements to service a range of industries including but not limited to Mining, Sugar, Rail, Fuel and Defence.

We have a dedicated workshop with a team of experienced supervisors and machinist tradesmen who carry out works to our ISO 9001 Quality Accreditation with a high degree of competency.

Our fully trained staff have the ability to carry out overhauls and repairs on a variety of mechanical equipment with access to in-house machining & welding to ensure end to end service and meet quick turnaround times.

Our machine shop services include:

- Horizontal boring
- Vertical boring
- Grinding
- Milling
- Slotting
- Turning

An aerial photograph of an industrial construction site. A large white crane with a black boom is positioned on the right, lifting a large metal structure. In the background, a large industrial building with a grey roof and green accents is visible. A yellow and red train engine is on the tracks to the left. The sky is blue with scattered clouds.

PROJECT MANAGEMENT

Wulguru Group's experienced project managers have the qualifications and capability to professionally manage even the most complex of jobs.

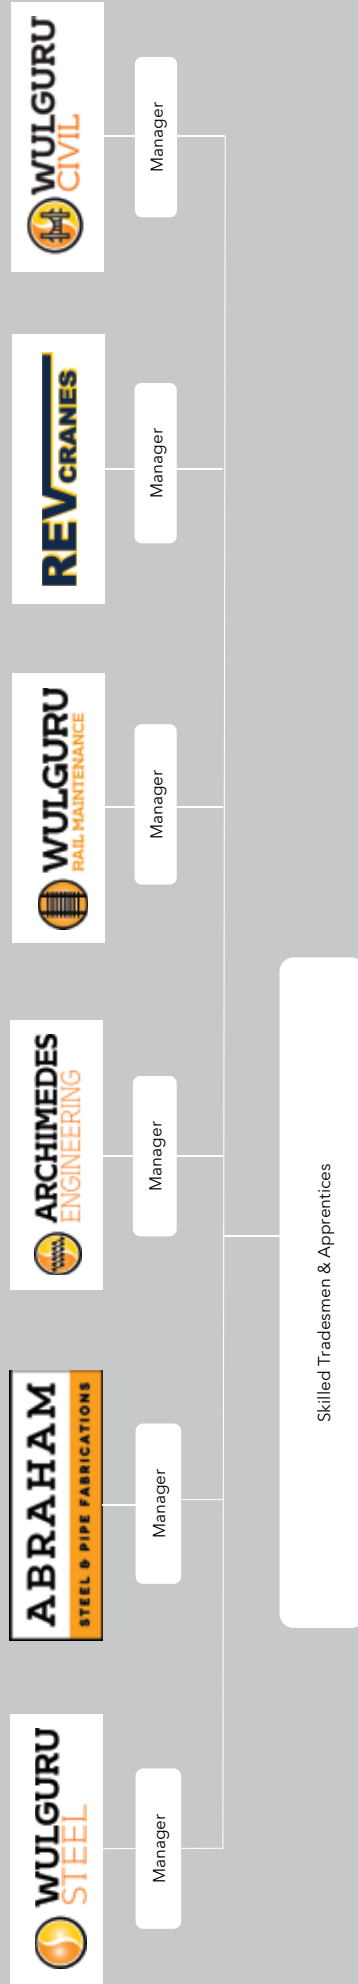

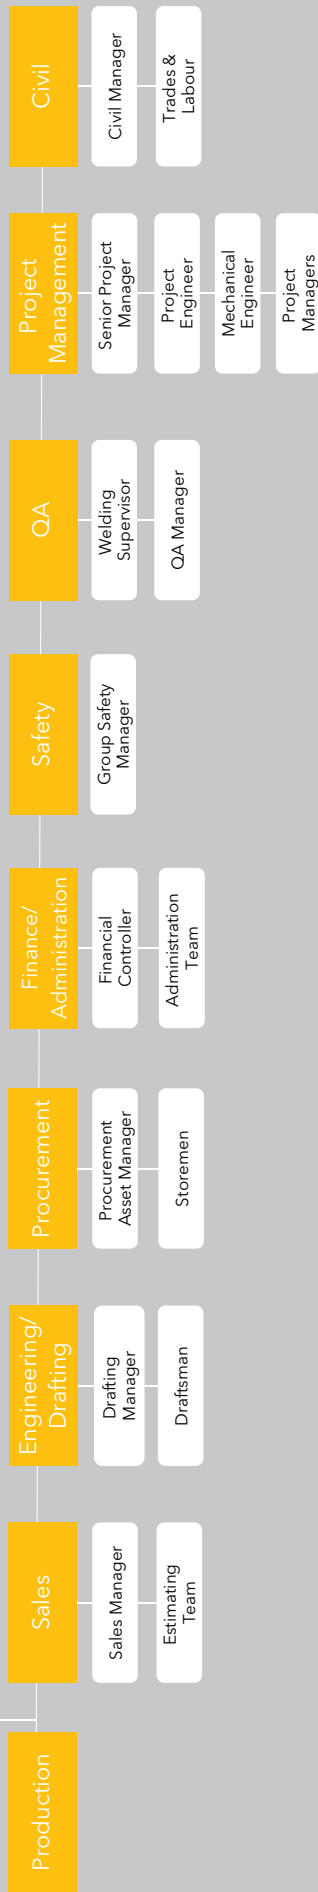

The Group has invested heavily in the latest computer software to assist with the management of your project. The system provides critical path and cost analysis to keep all parties informed on the progress of the project. Any unforeseen interruptions can be rescheduled with ease.

Wulguru Group can co-ordinate all activities of a project including design, manufacture, supply, installation and commissioning so the client only has to deal with one point of contact.

The Wulguru Group is a privately owned company employing more than 250 staff

ABRAHAM STEEL & PIPE FABRICATIONS

Abraham Steel provides services to the fuel industry including piping, fabrication and repair industry specific maintenance services.

Our team of highly skilled pipe fitters and pressure welders specialise in premium pressure pipework projects including the use of exotic stainless steels.

We are recognised as one of the best in the field delivering more than 50 years of excellence to clients in the fuel, mining, chemical, sugar processing, and construction industries Australia-wide.

Backed by the scale of the Wulguru Group, we offer a complete range of mechanical steel solutions and can take on the largest of projects with confidence. From design to fabrication, installation to maintenance, we can assist with all aspects of your project.

Our long term clients include Puma, Shell, Viva Energy, Caltex, BP & ATOM.

ABRAHAM

STEEL & PIPE FABRICATIONS

WULGURU RAIL MAINTENANCE

*Complete Rolling Stock
Maintenance Services.*

We specialise in the maintenance and refurbishment of above rail rollingstock including wagons, bogies, wheels and axles. Our purpose-built site is equipped to undertake the largest of projects and includes more than 15,000m² of workshop, paint, blast and wheel machining facilities.

We are a fully accredited Rolling Stock Operator under Rail Safety National Law and committed to delivering quality products, on time. Our Rail Safety Management System ensures the safety of our staff and the reputation of our clients.

We can undertake all aspects of wagon maintenance, rail wheel set and bearing maintenance, bogie reconditioning services and can provide planned and unplanned offsite services.

ARCHIMEDES ENGINEERING

Designing and manufacturing product handling solutions.

Established in 1975, Archimedes has developed a reputation for producing quality equipment that is supplied throughout the world.

Our team of highly skilled tradespeople specialise in the manufacture and supply of screw conveyors, bucket elevators and material handling equipment and systems. To complement the material handling equipment range we are also involved in the design and fabrication of hoppers/bins, racking and platforms along with most other structural elements.

Backed by the scale of the Wulguru Group, we offer complete project services from design through to installation/commissioning and scheduled on-going maintenance plans for all equipment.

Archimedes Engineering provides a comprehensive review of operations process plants to provide production improvements & optimisation options that are customised to your specific requirements.

ARCHIMEDES
ENGINEERING

REV CRANES

*Mobile All Terrain
Cranes for the most
challenging lifts.*

We pride ourselves on our ability to do the difficult lifts.

Servicing a wide range of industry across North Queensland, our versatile fleet with experienced operators can find a solution to even the most difficult job, including dual lifts.

Specialising in Franna cranes, we have extensive experience in relocating rail assets and moving large infrastructure in tight spaces and are compliant with all safety systems.

REV CRANES

WULGURU STEEL

*Supplying equipment
and services for general
engineering and fabrication.*

Wulguru Steel started with meat processing work in 1976 and has since expanded to take in manufacturing and fabrication across the mining and sugar industries as well as government infrastructure and more.

From small repairs and maintenance jobs through to multi-million dollar projects including heavy structural steel work, plate work, duplex stainless steel, tanks and pressure vessels, we can take on any job.

We can advise on plant and process layout, construction, operational management and can project manage the total installation. We offer complete project management including engineering design, CAD facilities and design and manufacture of mineral processing equipment.

In addition to onsite installation we can control our own transport including semi-trailers and flat-bed trucks for complete supply chain control

We also offer a large labour workforce.

WULGURU CIVIL

We specialise in the difficult tasks, taking on specialised projects in high-risk, active sites.

Our dedicated team works within operational plants to ensure works are delivered on time and on budget whilst adhering to the most rigorous of safety protocols.

We work with clients from a broad range of industries to deliver routine civil solutions within high risk operational sites.

Backed by the scale of the Wulguru Group, we can provide solutions to all of your civil needs whilst calling on the resources of the Wulguru Group to deliver all aspects of your project.
